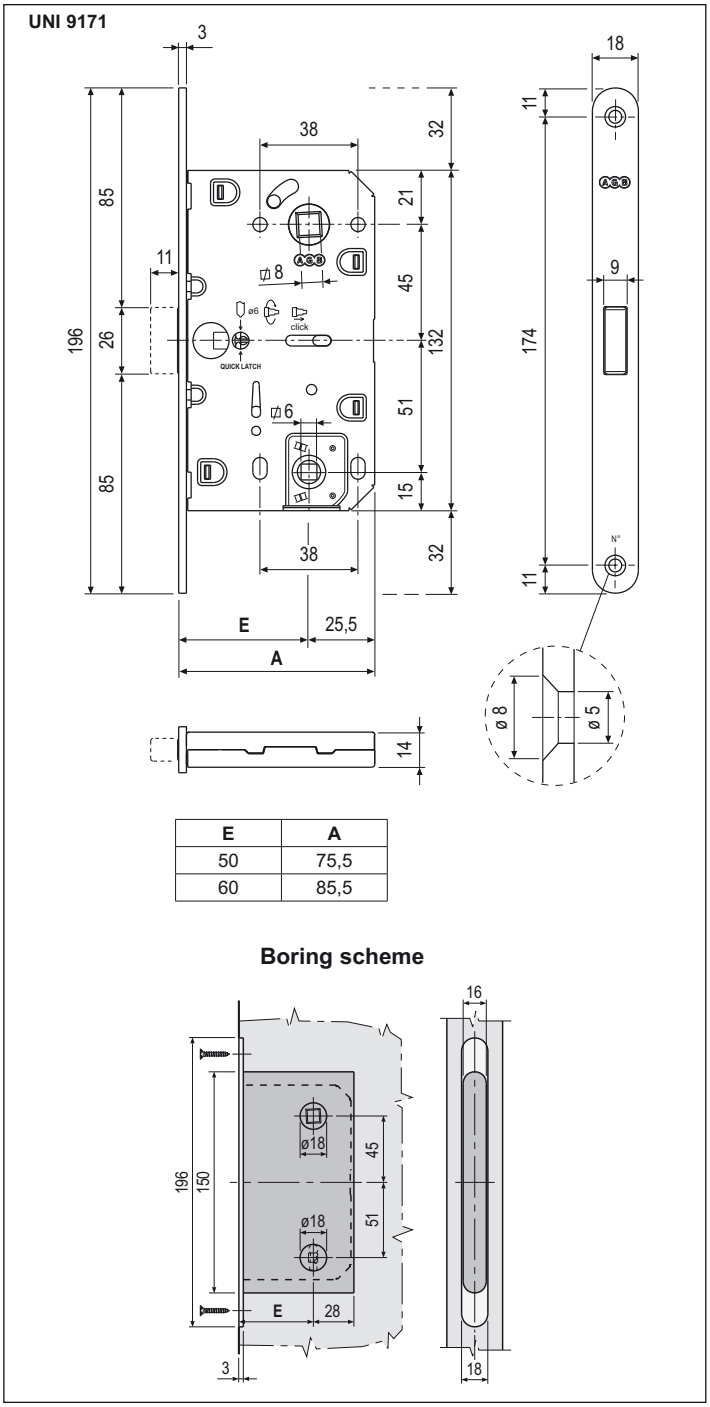
Mediana Polaris bathroom lock - 96 mm centre, 18 mm forend

WC



E	A
50	75,5
60	85,5

Boring scheme

Description

Magnetic flush-mounted lock with polyamide reversible latch, with finish.
The key blocks the latch also functioning as bolt but leaving the handle free.
The lock features no protuberances on the forend, thanks to the latch which is entirely retracted into the casing. Steel front (18 mm) with rounded edge, 50 and 60 mm inlet. Centre, 96 mm. Knob-plate, 6 mm. Bored steel casing for handles mounting by means of through screws.

Application

The symmetrical, magnetic latch renders the lock right/left handed.

Mounting

Cut a slot and include a milled component on the panel (dimensions in drawing). Fix the lock with two screws (3,5x20 mm).

NB. *Special packaging with only one key differ inside are available on request for industrial applications.*
